

INTRODUCE

U2U Network & DePIN Subnet Node

www.node.u2uglobal.xyz

WHAT IS A NODE?

Node is an electronic device (phone, computer ...) connected to the internet and has the ability to receive, create, and send information that helps create and maintain the blockchain network.

NODE DOES TASKS:

Authentication Storage Manage transaction status And receive rewards from the network when completing the tasks

WHAT IS NODE SALE?

A number of nodes are sold to individuals/organizations to promote the decentralization of the network and **increase the number of participants and contributors to the network.** Node Sale sells participation in the operation of the blockchain network in the form of NFT licenses. These Nodes/NFTs will perform a certain task for that blockchain such as: proof, data verification, Checker, ... and receive rewards.

BENEFITS

FOR EARLY ADOPTERS WHO HELP BOOTSTRAP THE DEPIN SUBNET

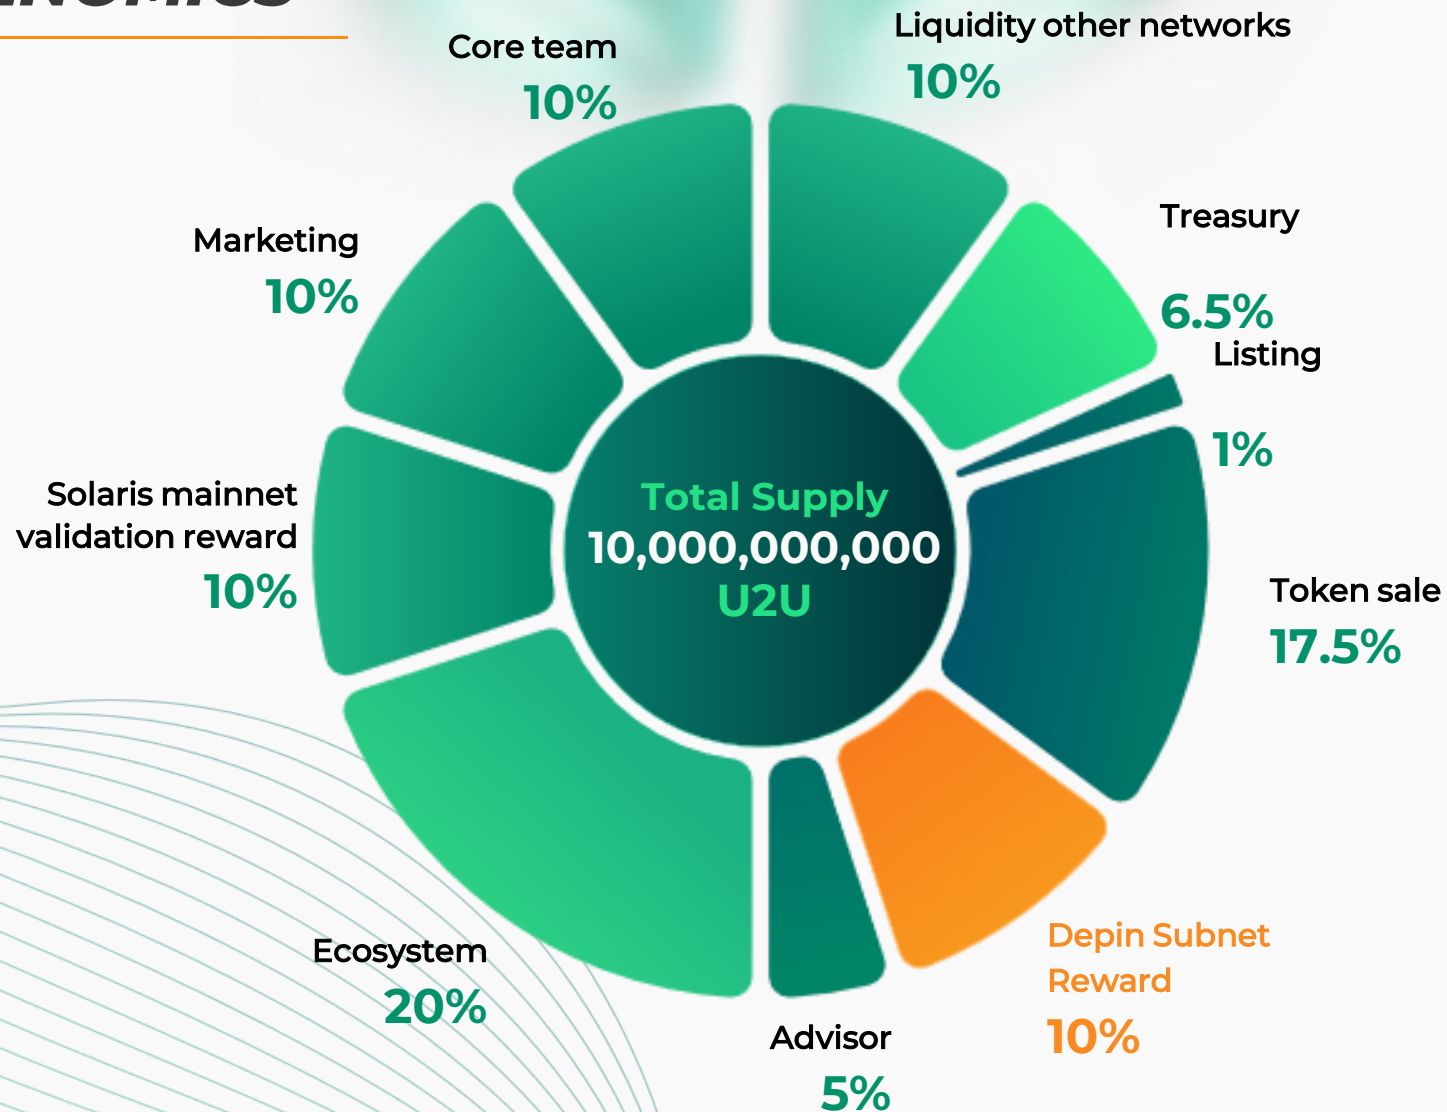

1B U2U - NODE REWARD POOL

A reward pool containing 1 billion U2U tokens has been set aside exclusively for incentivizing DePIN Subnet node operators. This substantial pool will be disbursed gradually over a multi-year period, with the amount of rewards decreasing each year to ensure long-term sustainability and encourage early participation.
