NETWORK SCALING LANDSCAPE

U2U SUBNETS

dApps built on the U2U Subnet will **reduce their reliance** on the mainnet for data availability. Operating your own Subnet means possessing a **modular** on top of a U2U Network while still **maintaining decentralization, security, and consensus**. Transactions executed on subnet will affirm U2U Chain **scalability, network performance, and lower transaction costs**.

USERS

Monetization Opportunities:

Pay less for data, storage, and computing by sharing resources. Get rewards for contributing your own unused resources.

Own Your Data:

Keep control of your data with decentralized storage solutions.

More Secure:

Leverage blockchain for enhanced security and data privacy

Open & Fair:

Anyone can participate and contribute. Get rewarded for spending the network.

More choices and competition:

With a decentralized approach, there could be more providers offering competing services, leading to potentially better deals for end users.

PRODUCT HIGHLIGHT - U2DPN.XYZ

World's First DEPIN project based on U2U's DPNSubnet running on Mobile devices

U2DPN - a platform providing Virtual Private Network (VPN) solutions developed on Subnet technology by U2U Network. U2DPN allows mobile devices to become a network node that divides internet bandwidth to all other devices in decentralized infrastructure DPN subnets.

> CRYPTO PHONE MARKET OVERVIEW

? What is Cryptophone?

A cryptophone is a smartphone designed to support blockchain and cryptocurrency-related features. These devices typically incorporate technologies that help secure data, support crypto transactions, manage digital assets, and access decentralized applications (DApps).

✓ Growth:

700,000+

The JamboPhone was sold within a year.

8 Million

Web3 Wallet from Jambo, rapidly expanding to emerging markets (Africa, Southeast Asia, Latin America).

✖ Crypto phone attractions:

- Price: \$599-\$999, reasonable price
- Receive daily airdrop rewards even without owning the product physical product

WHAT IS A NODE?

Node is an electronic device (phone, computer ...) connected to the internet and has the ability to receive, create, and send information that helps create and maintain the blockchain network.

NODE DOES TASKS:

Authentication Storage Manage transaction status

And receive rewards from the network when completing the tasks

BENEFITS

FOR EARLY ADOPTERS WHO HELP BOOTSTRAP THE DEPIN SUBNET

1B U2U - NODE REWARD POOL

A reward pool containing 1 billion U2U tokens has been set aside exclusively for incentivizing DePIN Subnet node operators. This substantial pool will be disbursed gradually over a multi-year period, with the amount of rewards decreasing each year to ensure long-term sustainability and encourage early participation.

Validators

The Backbone of U2U's Network

Validators are the cornerstone of U2U's network. They play a pivotal role in U2U distributed network by processing transactions and realtime participating in consensus mechanisms. This active involvement contributes significantly to making U2U the most censorship-resistant and one of the highest-performing blockchain networks in the world.

Delegators

Powering Network Validation

Delegators play a vital role in the validation process and are duly rewarded for their contribution to securing the network. Their role involves staking U2U Token by delegating them to validator nodes, thus fortifying the network's reliability and integrity.

Epoch Rewards

Fostering Network Security

Epoch rewards represent a critical component of our network. These rewards are drawn from our reserve and serve as a strong incentive for validators to join us in safeguarding the network. The rewards are distributed at the end of each epoch, and each epoch spans a duration of 7 minutes.
